Streamline Projects.

Tracker Suite for Projects is an award-winning project management solution that functions across your entire organization. It includes online documentation, organizational and individual schedules, process control, and much more. It also captures information and provides management reports on vital activities like job costing, project status, and resource loading.

- **Project Tracker.** This filing cabinet contains all your company's project documents, contact lists, and all data concerning project-associated tasks and meetings.
- **Time Tracker.** Timecards, managerial time/billing approvals, and time accounting tasks are completed here.
- **Expense Tracker.** Integrated database for online expense tracking, approval, and processing.
- **Purchase Tracker.** This tool facilitates all tasks along the purchasing process lifecycle—from the creation of a purchase request through processing for billing.

Optimize Human Resources.

Tracker Suite for HR serves as a central personnel data management system. It provides secure, fully customizable online employee evaluations, personnel address books, and applicant tracking. In addition, reports can track head counts, salary levels, review dates, and much more.

- **Applicant Tracker.** Stores all of your applicant data files, resumes and profiling information, in addition to current job postings. It streamlines the entire hiring process.
- **Personnel Tracker.** Provides a stand-alone online repository for employee information, including ID, phone number, office location, supervisor, birthday, and benefit plan.
- **Skills Tracker.** Create, conduct, and grade employee exams in an automated, secure environment.
- **Evaluation Tracker.** Secure database for managing and processing employee evaluations.

Order a Free Evaluation CD.

Automate Sales.

Tracker Suite for Sales is a powerful set of tools for automating and improving sales force productivity. It includes an effective and secure Web-based marketing and lead generation engine, and online prospect files. Plus, it supplies management with useful marketing effectiveness reports and sales projections.

- **WebSite Tracker.** Create instant Web pages, including Metatags with no HTML coding. Each Web page has a hit counter and can be automatically registered with search engines. Leads captured through Website registration are funneled to your sales reps.
- **Prospect Tracker.** This comprehensive database contains your contact information for leads. It also tracks correspondence, action items, and provides full pipeline management.
